Feed the Future Innovation Lab for Horticulture

Submitted by lbork on November 13, 2015

Carrie Teiken (left), a University of California, Davis graduate student, examines a citrus tree for disease along with volunteers and farmers in Uganda, while working together on a Trellis Fund project for the Horticulture Innovation Lab. The Trellis Fund pairs small, in-country organizations with U.S. graduate students for the duration of a short-term horticultural project, furthering students' field experience while enabling them to use their expertise to build the capacity of their partner organization. Teiken is pursuing a PhD in plant pathology, with research focused on citrus huanglongbing, a serious disease of citrus plants. *Photo by Stephen Ssemakula, Horticulture Innovation Lab*
